

LH 4542 GT/LFY**95 RM****POSITIONING & MANAGEMENT**

LH 4542 RR/LFY is a tall silage specific hybrid and has a dark green canopy with up to 12 leaves above the ear. Even while planting at lower populations, 4542 will achieve its huge tonnage potential of highly digestible silage with excellent staygreen that will allow you to extend your harvest if necessary.

**HYBRID ADVANTAGES**

- New genetics with native drought tolerance
- Tremendous staygreen and drought tolerance
- Pink cob hybrid with huge ears
- Exceptional tonnage with 12 leaves above the ear

DISEASE RATINGS

Gray Leaf Spot	0.0	Southern Leaf Blight	0.0
Eye Spot	0.0	Common Rust	0.0
Anthracnose Stalk Rot	0.0	Goss's Wilt	2.0
Northern Leaf Blight	0.0		

OVERALL CHARACTERISTICS

Corn on Corn	3.0	Emergence	2.0
Suggested Population	24-30	Flowering For Maturity	Moderately Late
Herbicide Sensitivity		Cob Color	Pink
Foliar Fungicide	Recommended	Husk Cover	
Drought Tolerance	1.5	Shank Length	
Test Weight	2.5	Number of Kernel Rows	
Drydown	3.0	Ear Type	Semi-Flex
Stay Green	1.5	Silage Rating	1
Root Strength	2.2	Leaf Angle	Semi-Flat
Stalk Strength	2.2	Ear Height	Medium High
Early Vigor	2.3	Plant Height	Tall

1: All Rating Scales are 1 to 5; (1 = Excellent, 5 = Poor, 0 = No Score)

2: Herbicide Sensitivity: PI = Pigment Inhibitors, Pre PI = Pigment Inhibitors applied Pre-Emergence, SU = Sulfonylureas, GR = Growth Regulators
